

Put your cursor over the seeleystreet.org/blog

Select **DASHBOARD**

Put your cursor over the **POSTS**

Select **ADD NEW**

Type in your title

Type in the body of your post

If you wish to add pictures, click the **ADD MEDIA** button

There are two ways to add pictures. Either **UPLOAD** picture to the media library (make sure they are not 3 meg pictures) or just **INSERT FROM URL**

We will start with **INSERT FROM URL**: Click the link

Copy and post the URL address from an image on a website. The Seeleystreet Photo Gallery is a great place to put your photos and use for the posts. On the gallery, just right click on the photo, select Properties and copy the address and paste it in.

Choose how to align the photo on the post: left side, middle or right side.

- Insert Media
- Create Gallery
- Set Featured Image

Insert from URL

Insert from URL

[http://seeleystreet.org/coppermine/albums/userpics/10003/thumb\\_IMG\\_0199.JPG](http://seeleystreet.org/coppermine/albums/userpics/10003/thumb_IMG_0199.JPG)

Caption

Alt Text

Align

```
This post is about how to add new posts...
```

The picture stuff is inserted into your post. You can type stuff before the picture stuff or after it, depending on how you want the post to look.

You can get a PREVIEW of how the post will look by clicking the **PREVIEW** button.

This will open a new window on your computer to view your post.

You then can close the preview window .. If you need to change something , just make any corrections or changes and preview again.

If you decide it is good enough, press **PUBLISH**.. you can always go back and edit your own posts.

The rest of the stuff you can learn to use as you go along, most are never used.

Remember that even if it looks bad at first, I can go back and pretty it up for you. With use, you will be able to do whatever I can do. So.. no worries!
